

Stained Glass News

project pattern #111

Flying Witch by Dionē Roberts

- 1) Cut one piece of glass following the black outlines. This will be the bases to which you fuse the details.
- 2) Cut one of each piece of lettered pattern, being sure to cut accurately so that the pieces do not overhang the base glass. Place small wire rings, made of high-temperature wire, between the colored glass and the clear base. Add curls of high-temperature wire extending from the broom.
- 3) Decorate the colored glass with scrap details as indicated by the light gray lines, or as you like. Then, full fuse.
- 4) If you want to make a windchime, cut the windchime pieces. Place small wire rings, made of high-temperature wire, between the colored glass and the clear bases. Full Fuse.
- 5) Use wire to hang the windchimes, adding beads if you like.
