project pattern #113

CELESTIAL CORNER

BY JUDY COLEMAN

Increase this image by 175% for a corner that measures 9¾" x 13½"

Framing and Hanging

Frame the two straight sides of with metal channel.

The rounded edge should be reinforced with wire, which is then soldered to the metal frame on each end.

Solder wire hangers to the back of the panel at the top corners. Secure the panel to the window frame by placing a small nail through the rings and into the window frame.
